MINING, BUSINESS AND STOCKS

NEW YORK BON. SWELLED TOTALS

The Sales During Forenoon Sessions of Mining Exchange Ex-... ceeded Eight Thousand.

21,000 SHARES SOLD

Carisa Softened-Ajax in Demand-May Day in Better Tone-Closing Quotations.

The transfers of New York Bonanza swelled the forenoon sales on the mining exchange to more than \$8,000, the market value of 21,700 shares. Ajax was the first stock called into the pit, and some small lots changed hands at 164. Carlsa came next, opening with 1,500 shares going at 23 cents, it declined to 211/2, while Little Bell found it difficult to secure a taker at any price; however, 100 shares went down at 40

New York maintained remarkable steadiness all through the call, and did not fluctuate more than a cent a share. The stock showed, some weakness, though, compared to yesterday's quotations. May Day was in slightly better tone. Wabash appeared in the active list, while Star Consolidated found slight demand at 9½ cents.

The closing quotations and sales were as follows:

school of mines department of the University of Utah. The gentlemen school of mines department of the University of Utah. The gentlemen were guests of the latter institution yesterday and were present when the machinery in the metallurgical building was in operation. The visitors were extended every courtesy possible by the officers of the University and they have expressed themselves as being well pleased with the entrainment given leased with the entertainment given nem. They were somewhat surprised o find here a mining school so well quipped as the one at the University nd, with the many natural advantages be had here, could see no reason by it should not grow into importance mong the mining schools of the na-tion. President MacLain called on President Kingsbury again this afternoon and had a conference with him over school matter.

THE SO. COLUMBUS. Assays Show Strike Made This Week to

Be a Good One. Assays taken on the ore taken from the three-foot vein opened during the week at the South Columbus mine at Alta shows decidedly encouraging re-sults. The figures given out by Presi-dent Jacobson during the day show values of 15 per cent lead, 3.5 per cent cop per, and 78 ounces in silver.

SHOSHONE'S RICH ORE. Assayer Will Report Results During the

Afternoon. The ore from the great Shoshone mine in the Bullfrog, Nev., district was sam-pled at the Pioneer plant yesterday afternoon and the controls are now in possension and the controls are now in pos-session of the assayer. The returns are expected during the afternoon by Man-ager Montgomery and Director Mac-Donald, who are in the city to look after the disposition of the shipment.

WHAT MAY HAPPEN.

liow Movements of Smelter Trust Are Viewed in Boston.

A Boston authority, which keeps well posted on Utah mining affairs, says of American Smelting & Refining:

Heretofore lead smelting has been the chief basis of the American Smelting & Refining company's operation, but we understand the company contemplates expanding considerably in the copper smelting floid.

Most of the large copper producers have their own smelting plants, but there are many sections of the country where the erection of a copper smelter.

where the erection of a copper smelter would greatly stimulate copper pro-duction, and the American Smelting & Refining company could buy up, for a term of years, the prospective producof many promising copper proper-

es.
The American Smelting & Refining ompany, in other sections of the country has paid a high price for the control of properties to eliminate competion and there is no reason why the ame tactic should not be employed in the climation. By taking over the same factic should not be employed in this situation. By taking over the United States Mining and Bingham, the smelting trust would control the Utah situation, as it already has a large lead smelter at Murray and the only other large smelter in the state would be the Utah Consolidated, and that company is not handling ore other than from its own mines.

rom its own mines.

The greatest development in this connection is in Utah where the American Smelling & Refiring company will all once begin the crection of a 2.000-ton copper smelter. Possibly the delay in reaking public its plaus concerning this Utah situation is reflected in the ad-vance in certain mining shares in the

Hoston market.

If the American Smelting & Reilning company should get control of the United States Smelting company, it would not need to build a new smelting plant, but simply add additional furnaces to the present plant.

COLUMBUS CON. MAKING RECORD.

Secretary Snow Has Issued an Interesting Statement Concerning March Earnings.

CONCENTRATES OF COOD CRADE

Average Value \$28.24 to the Ton-Basis of Concentration - Conditions at the Mine.

Arthur E. Snow, secretary and treasarer of the Columbus Consolidated Mining company operating at Alta, has completed a statement showing the results obtained during the month of

During the period. Mr. Snow states, there were 45414 tons of concentrates produced which had a gross value of \$28.24 per ton or a total of \$12,820.02. The expenses aggregated about \$7,000, leaving a net balance for the month

F-over \$5,800. The mine delivered to the mill during the month, 1,788\(\frac{1}{2}\) fons of crude ore. The recovery from this ore amounted to a value of \$8.74 per ton distributed as follows:

Silver, ounces The loss in tailings represented a value of \$2.70, distributed as follows: Copper, per cent

This shows a total value in the ore of \$11.44. The ore was concentrated in the ratio of three and three-eighths tons of crude ore into one ton of concentrates, which makes 454¼ tons of concentrates secured from the 1.768½ tons of ore and gives the concentrates a value of \$28.24 per ton. The average per cent saved (of all) was 99½. The concentrates assayed as follows: concentrates assayed as follows:

Lead, per cent. 15.05
Copper, per cent. 4.55
Iron, per cent. 16.22
Silica, per cent. 8.96 Zinc, per cent......12.65

'The principal development work that "The principal development work that is now being done," says Mr. Snow, "consists of the sinking of two shafts from the tunnel level. One is near the big lead stope. The other is a new shaft that is being sunk to operate the Howland ore body. The former shaft has passed through 40 feet of ore. It is

has passed through 40 feet of ore. It is now down near the 100-foot mark and the bottom is still in ore. "Drifting has now begun from the bottom both east and west and both faces are in ore of good quality. "The water in this shaft near the big lead stope makes it difficult and expensive to sink, although it is now flowing only about 50 gallons per minwing only about 50 gallons per min-

The shaft which is being sunk at the Howland is about 100 feet from at older shaft that was standing full of water. When this water was pumped out the shaft was found to be caved and it was considered advisable to sink another rather than clean the old one one. The new one is double-compartment and is now down about 45 feet. We will go to the 100-foot mark and will then drift both ways on the ore body. This shaft is supplying considerable ore as is also the shaft near the big lead stope. This, together with the stoping that is being done at the Howland end and along the Braine fissure, will furnish the mill at present with about 800 tons of ore daily. There is also a little high grade ore coming out all the time, and we may expect to find a high grade ore body at the bot-tom of the shaft now sinking."

TO CHANGE ARTICLES.

Star Con. Directors Discussed Matter at Meeting Yesterday.

The directors of the Star Consolidated Mining company held a meeting yester-day afternoon to discuss the matter of may atterneon to discuss the matter of changing the articles of incorporation of the company so as to make the stock of the company assessable. Upon getting legal advice the directors concluded that the change could be made, and a committee was appointed to attend to the matter.

With the affairs of the company of

tend to the matter.

With the affairs of the company as they are it is almost impossible to carry on development work. While there is a large tonnage blocked out in the mine, the ore is not of a grade sufficient to make it pay. Consequently, the co-poration has no way of raising funds.

ORE IN THE UTAHNA.

Secretary E. W. Keeley Has Received Cheering News from Goldfield.

Secy, E. W. Kelly of the Utahna-Goldfield Mining company received a message from Supt. W. F. Gray yeserday, stating that ore assaying \$1.23 the ton had been encountered shaft now in the process of sinking. Naturally Mr. Kelly feels delighted. Samples of the ore encountered been sent him by express. The p ty of the company is near Goldfield.

BEAVER COUNTY MINE.

Richfield Civizens Make Inspection of Empire Praperty.

H. N. Hayes and James Wilson left H. N. Hayes and James Wilson left Saturday for Beaver county, going by way of Provo, where they were folied by James Christiansen. The object of the trip of those parties was to examine the Empire property, with a view, if satisfied with an investigation, of bonding it, says the Richfield Reaper.

The Empire lies place to the Wild the Lewis properties which are developing into great mines. A shaft was sunk on the Empire claim a few years ago and a very rich "pot" of ore was taken out. The vein is identical with that of the Wild Bill, which has been followed to a depth of 600 feet. These veins are of the "sausage" character—opening out, then narrowing up, alternately. The Wild Bill has netted divi-The Wild Bill has netted divi-

The parties will meet the man who took the ore out of the Empire, and who will be able to give them full information of the past development of the property.

Case Was Dismissed. Inasmuch as the Highland Boy Consolidated and Petro mines in Bingham are now under the control of the Utah-Apex company, the litigation which

has been dismissed. An order to this effect was made yesterday afternoon by Judge Lewis of the district court. The suit was brought to recover \$50,000 damages for alleged trespass on the Petro lods mining claim, and the illegad extraction of ore.

CONCENTRATES.

George H. Atkins of Milford recently coked over the mines at Good Springs,

The Lucy Hawthorne property in El Dorado canyon, Nev., has been bonded for \$15,000.

Electrical Engineer William F. Gray s expected to return from Denver in a few days. At the Pioneer sampler today two

cars of ore arrived from Bingham, and two from Stockton. J. F. Gibbs expects to leave for Las Vegas, Nev., tonight, to look into the geology of that region.

Sidney Bamberger, manager of the Fortuna mine of Bingham, is on an inspection trip to that property.

Charles C. Parsons, chief counsel for the Newhouse mining interests, came in from Denver yesterday afternoon. Considerable activity is reported from Mountain City, Nev. The mill on the Nelson property is in operation again.

Andrew Gebhardt, owner of the Phoenix mine in the copper camps of Bing-ham marketed a lot of crude ore today, Supt. Frank Janney of the Utah Cop-per company is in the city today to confer with General Manager Jackling. The T. & B. samplers reported the arrival of nine cars of ore from Tin-tic, two from Nevada, one from Bing-

ham and six from Frisco. A car of ore from the Lead King mine at Ely, Nev., was marketed yes-terday, the controls showing 72.4 per cent lead, and 2.8 ounces silver.

Judge R. N. Baskin expects to visit American Fork as soon as the snow dis-appears sufficiently for the operation of wheeled conveyances into camp. The ore and bullion settlements re-

ported late yesterday afternoon by Mc-Cornick & Company were: Crude ore and concentrates, \$28,500; base builion, \$33,200; gold builion, \$30,400. President R. D. Evans of the United States Mining company arrived in the city last evening. He was accompanied by Mrs. Evans and the Misses Hunt and the Misses Niles of Boston.

Thomas O-Hara of Dayton, O., who is interested in the Pittsburg Con., at Alta, has arrived from the east, and will leave for the company's mine in

American Fork canyon tomorrow. The Sygnet company operating in American Fork canyon, and which is controlled by Sat Lake parties, has re-sumed work in the tunnel with which

President R. D. Evans of the United States Mining company, who came in from the east last night, spent the greater portion of the day at the com-pany's smelters at Bingham Junction. was accompanied by General Man-George H. Robinson, general man-ager of the Brittania mines in British

olumbia and a large shareholder in the Yampa mines at Bingham, came in from the northwest yesterday after-noon. After looking into local interests for a few days he will take his departure for the east. W. J. Slee, the representative of the Allis-Chalmers company, who is en-gaged in the installation of the Hancock jugs in several camps of the west, departed last night for Newhouse, ac-companied by Chief Metallurgist A. J. Bettles. Upon his return Mr. Slee will proceed to the Encampment district in

Wyoming, where the Ferris-Haggerty mine is to be equipped with the Han-cock machine. At the plant of the Arl-zona Copper company each Hancock jig installed there is handling 28 tons of Mads Christensen, who came down

Monday from the Belknap property, where he has been prosecuting work last winter, reports very flatteiring and encouraging developments in the tunnel recently. The hard country rock nel recently. The hard country rock has given way to a soft decomposed formation which is identical with that surrounding the veins of the B. W. & H. Mr. Christensen is quite confident that in a few more feet something good will be struck. He now has a great deal of faith in this property, notwithstanding it has been heretofore looked upon as a very doubtful proposition.—Richfield Reaper.

E. W. Packard and J. C. McChrystal, the mining engineers who came here last week to assist in formulating a plan of operations at the Tiptop group of mines, on the Hailey gold belt, have returned to Utah. They have ad-vised a temporary suspension of opera-tions below the 900-foot level of the Tiptop, while the upper levels are devel-oped more thoroughly than they have been, and two or three of the other and adjacent claims of the group are devel-oped. This work will afford employment for as many miners, at least, as have been employed at the Tiptop, and may lead to the employment of many more.-Wood River Times.

REMOVED.

The office of the Ploneer Ore Sampling Co. is moved to 514 Dooly Block.

winnerd, Kan., April 27.—Arthur E. Ireland, national organizer for the American Federation of Labor, was sentenced to the district court here today to six months in jail on conviction of a charge of assault on J. B. Harrity, another union machinist, at Arkansas City, Kan., last July. Six months in jail was the lowest southern the last statement of the control of t jail was the lowest sentence that could be imposed on Ireland. Ireland's motion for a new trial was overruled, and his attorneys filed a new bond for him and gave notice of an appeal to the su-

Strike on Panama Canal.

Panama, April 27,-All the contract Jama)cans working at the aqueduct strike today, alleging insufficient food as the cause. Six policemen who were summoned by Engineer Barrit to compel the men to work were badly beaten, and Barrit was stoned. Armed police commenced several years ago, in which men re-established order and pre-the Petro company figured as plaintiff | vented a riot.

Supporting Orders Came in at First, Gains Being Mingled With Losses.

LEADERS MADE BIG BREAKS.

Confidence Upset, Speculative Holdings Thrown Over, Then Strong Rallies.

New York, April 28 .- The stock market showed evidence of support in the openng dealings and many good gains were mingled with losses. The international stocks followed London's lead to a higher level, Missouri Pacific, Louisvide & Nashville and Baltimore & Ohio rising about a point. Consolidated Gas jumped 1% and Lead 1%. On the side of losses there was a drop of 3 points in North-western, a point in United States Rubber western, a point in United States Rubber preferred and of large fractions in United States Steel preferred Passed Steel Car. General Electric and United States Rubber. Liquidation was in full swing again ten minutes after the market opened, causing general losses of a plint or more. Exceptional weakness cost Northwestern 6 points, Central of New Jersey 4½, Colorado Fuel 4, Republic Steel preferred 3¼, and Atlantic Coast Line. Pressed Steel Car preferred and American Car 3. Little resistance was shown to the steady pressure against the market and the sales of all classes of the high grade stocks reached a large total. Precipitate breaks in leaders from time to time upset confidence and there was a general throwing over of speculative holdings. By 10:30 the market showed a feverish rahying tendency. Union Pacific recovered from 12½ to 12½, St. Paul, Louisville & Nashville, Atlantic Coast Line, Amalgamated Copper and United States Steel preferred rebounded nearly as much. At the low point Louisville & Nashville, C. & O., Southern Railway preferred, Locomotive, Amalgamated Copper, Sloss-Sheffield Steel, General Flectric, United States Steel preferred and Tennessee Coal were off 1½ to 2½. Northern Pacific was fairly supported and rose 2½.

The definite arrest of the decidine found plenty of shorts uncovered and they bought freely, carrying the recovery further and establishing gains of 1½ for Southern Pacific and 1 for Reading, Canadian Pacific, the Eries, New York Central, Metrooplitan Securities, Lead and Corn Products. Consolidated Gas rose 3¼. Northern Pacific and 1 for Reading, Canadian Pacific, the Eries, New York Central, Metrooplitan Securities, Lead and Corn Products. Consolidated Gas rose 3¼. Northern Pacific 3½ and Smelting and the Chicago Terminal stocks about 1½. The market was quiet and slightly unsteady at noon.

Honds moved in sympathy with stocks. Realizing in the strong stocks and a preferred and of large fractions in Unit-

the Chicago Terminal stocks about 1½. The market was quiet and slightly unsteady at noon.

Bonds moved in sympathy with stocks. Realizing in the strong stocks and a renewal of pressure against several leaders caused another setback. St. Paul and Union Pacific also lost their improvement and Louisville & Nashville, Atlantic Coast Line and Tennessee Coal reacted to near the lowest. Effective support was soon forthcoming. Although the market was lifted again to the best, the trading became practically stagnant on he rise. Fluctuations were narrow and variable during the afternoon. Business was comparatively light and of about equal volume on both the buying and selling movements. Amalgamated Copper was conspicuously strong and rose to 82½.

A break to 154% in Louisville & Nashville unsettled the market and carried prices off a point or more. Atlantic Coast Line fell 4½, Nashville, Chattanooga and St. Louis 5; Locomotive 4½, Lackawanna 4, Chicago Union Traction preferred 2½, and General Electric 3½. Pittsburg, C. C. & St. Louis rose 3½, and Northern Pacific 4½ in all. Changes from last night were mixed again by the reaction. Union Pacific reacted to below last night. The ilosing was active and very weak.
